

EXECUTIVE ASSEMBLY & ENERGY TRILEMMA SUMMIT 2022

TRANSFORMATIONAL SOLUTIONS IN TURBULENT TIMES

VisitScotland / Kenny Lam

12-13 OCTOBER 2022

P&J LIVE, ABERDEEN

An invitation to our World Energy Community

This is a significant moment in energy. As we experience the world's first demand-driven energy shock and navigate multiple once-in-a-lifetime crises, it is apparent to everyone, everywhere, that energy affects every part of life. The world energy agenda cannot be advanced by swinging from one priority to another. Successful energy transitions can only be achieved by maintaining focus on all pillars of the World Energy Trilemma – security, affordability and sustainability – to ensure no one is left behind.

The World Energy Council's Executive Assembly and Energy Trilemma Summit, co-hosted by the Scottish Government, will bring together the Council's diverse, worldwide membership community from nearly 100 countries and the leading changemakers from within and beyond the classic energy industry.

The two-day gathering begins with the Council's Executive Assembly, the first in-person convening of our worldwide energy community in two years, providing a forum to reset the energy conversation and converge on actions that progress sustainable energy for the greatest benefit of all people. Under the theme 'Transformational solutions in turbulent times', the events continue with the Energy Trilemma Summit where we will identify balanced opportunities for navigating successful global energy transitions in a faster-paced and more fragmented world.

Highlights

- ✓ Be part of this conversation at an important time as we move from crisis to transformational solutions.
- ✓ Connect with our worldwide member community at the Council's largest annual gathering.
- ✓ Engage with leaders from across the energy ecosystem to discuss practical solutions for successful energy transitions.
- ✓ Learn more about Aberdeen's clean and just energy transition journey.
- ✓ Network with peers at a reception hosted by Aberdeen City Council.

Join us for this
important
gathering

We are honoured that the Scottish Government is co-hosting our 2022 Executive Assembly and Energy Trilemma Summit in Aberdeen, a World Energy City actively engaged in the energy transition and with a long history of innovation. Discussions are particularly timely as we begin to celebrate 100 years of the World Energy Council by inspiring the next 100 years of energy.

12-13 OCTOBER 2022

P&J LIVE, ABERDEEN

How to participate

The World Energy Council's annual gathering welcomes the entire global member community.

The Strategic Community Conversation and Executive Assembly on 12 October are open exclusively to the World Energy Council's member community, while the Energy Trilemma Summit on 13 October is open to the Council's members as well as invited guests. This is a free event. Places are limited and registration is required.

“ In today's accelerated and turbulent energy environment, our Executive Assembly and Energy Trilemma Summit will bring together the World Energy Community to address opportunities to reset the energy leadership agenda and mobilise people-centric energy trilemma solutions to progress clean and just energy transitions in all regions.

Angela Wilkinson
Secretary General & CEO
World Energy Council

“ Scotland takes forward the COP 26 legacy and strengthens its commitment to deliver a just energy transition. Aberdeen - a world-leading energy city, actively engaged in energy transition and with a long history of innovation - is honoured to welcome the Council's diverse and inclusive energy community to reset the global energy narrative ahead of COP27 in Egypt.

Michael Matheson MSP
Cabinet Secretary for Net Zero, Energy and Transport
Scottish Government

12 OCTOBER

- Strategic Community Conversation
- Executive Assembly Plenary
- Networking Reception

13 OCTOBER

- Energy Trilemma Summit

- 01** How are leaders connecting energy prices, system costs, affordability, and equity concerns?
- 02** Which energy Trilemma solutions are already moving the dial on clean and just energy transitions, and how can these be kept on track?
- 03** In the new context of energy geopolitics and affordability, how can the widening implementation gaps be closed?
